Portfolio: [mohamed-junaid](https://mohamed-junaid.github.io)

Flutter Developer with 3 years of experience building cross-platform Android and iOS applications. Skilled in Flutter, state management, REST API integration, responsive UI development, and AI-powered development tools for faster, high-quality app delivery. Focused on clean code, performance, and scalable solutions.

AREA OF EXPERTISE

Flutter Firebase BLOC Push Notification (OneSignal, Firebase)
Dart REST- API Provider App Store & Play Store Deployment (Android & iOS)
AI-Assisted Development (ChatGPT, GitHub Copilot, Cursor, Claude)

PROFESSIONAL EXPERIENCE

Flutter Developer

Jan 2024 - Present

[Emstell Technology Consulting](#)

- Developed and deployed full-featured Android and iOS applications using Flutter
- Currently working on multiple in-progress mobile app projects focused on performance, scalability, and UI/UX
- Collaborated with cross-functional teams for API integration, state management, and client delivery
- Ensured high code quality through effective debugging, testing, and performance optimization

Flutter Developer Intern

Oct 2023 - Jan 2024

[Rootsys International](#)

- Completed 3 mobile application projects for Android and iOS using Flutter and Dart.
- Contributed to UI development, API integration, and state management using modern Flutter practices.
- Worked closely with senior developers to deliver clean, maintainable, and high-performance code.
- Gained hands-on experience in debugging, testing, and optimizing app functionality and UI/UX.

EDUCATION

MCA - Master of Computer Application

2025 - Present

[MANIPAL UNIVERSITY JAIPUR \(ONLINE\)](#)

- Currently Pursuing Postgraduate Studies in Computer Application

BCOM - BACHELOR OF COMMERCE

[BHARATHIAR UNIVERSITY](#)

PGDIMS (Post Graduated Diploma in Infrastructure Management Specialist)

Skymark IT Knowledge Park

Higher Secondary Education

GHSS PUTHUPARAMBA

PUBLISHED APPLICATIONS

- **Approach | أبروج**

Multi-service marketplace application connecting users with influencers, reporters, and service providers, including modules for shop listings, appointments, catering, chalet booking, and on-demand services. Designed with scalable architecture, dynamic filtering, and seamless booking workflows to enhance user engagement and service management.

Tech: Flutter (Provider), REST APIs, Firebase (Crashlytics, Analytics, Remote Config), OneSignal

iOS | Android

- **Darzi Tailor**

Operational platform for tailors to manage customer orders, track requirements, and streamline workflow execution within the Darzi ecosystem.

Implemented structured order tracking, real-time status updates, and efficient task management to improve operational productivity.

Tech: Flutter (BLoC), REST APIs, Firebase (Crashlytics, Analytics, Remote Config), OneSignal

iOS | Android

- **Your Billboard**

Classifieds marketplace app serving GCC countries and Lebanon, enabling users to buy, sell, and promote listings across multiple categories with free first-time posting.

Integrated social media SDKs and optimized listing workflows to improve user reach, engagement, and advertisement performance.

Tech: Flutter, REST APIs, Firebase (Crashlytics, Analytics, Remote Config), Facebook SDK, TikTok SDK, One Signal

iOS | Android

- **TimTimi**

E-commerce application in Kuwait focused on kids' toys and parenting essentials, delivering a seamless shopping experience with categorized listings and secure checkout.

Built with performance-focused architecture, smooth navigation, and reliable API integration to ensure a user-friendly shopping experience.

Tech: Flutter, REST APIs, Firebase (Crashlytics, Analytics, Remote Config), One Signal

iOS | Android
